Re: Case 18-F-0498:

Application of EDF Renewables Development, Inc. for a Certificate of Environmental Compatibility and Public Need Pursuant to Article 10 of the Public Service Law for Construction of a Solar Electric Generating Facility in the Town of Burns, Allegany County and the Town of Dansville, Steuben County

Notice of Submission of Moraine Solar Energy Center Preliminary Scoping Statement

Dear Stakeholder,

As you may be aware, EDF Renewables Development, Inc. ("EDF" or the "Applicant"), a subsidiary of EDF Renewables, Inc., is proposing to construct a major solar electric generating facility up to 94 Megawatts (MW) in capacity in the Town of Burns in Allegany County, and the Town of Dansville in Steuben County, New York (the "Moraine Solar Energy Center" or the "Project"). To construct the Project, EDF is seeking a Certificate of Environmental Compatibility and Public Need ("CECPN") from the New York State Board on Electric Generating Siting and the Environment ("Siting Board") pursuant to Article 10 of the Public Service Law and the Siting Board's rules (16 NYCRR Part 1000).

The Siting Board's rules require that, at least ninety (90) days before filing its application for a CECPN, the Applicant file a Preliminary Scoping Statement ("PSS"). The PSS provides an overview of the proposed Project and the scope and methodology of studies that EDF intends to conduct, the results of which will be included in EDF's application to the Siting Board. The Siting Board's rules further require that, at least three (3) days' before filing the PSS, the Applicant provide notice of filing to stakeholders and the community by publishing a notification in local newspapers of general circulation, and undertaking other measures contained in the Siting Board's rules (16 NYCRR §1005[e]).

Accordingly, enclosed please find a copy of the Public Notice advising that the PSS will be filed on or about February 19, 2020. The filing of the PSS will start a 21-day public comment

period on the scope and methodology of the studies proposed. Instructions on how to submit comments are provided in the Public Notice.

Sincerely,

/s/ Steven D. Wilson Steven D. Wilson Young/Sommer LLC

Attorneys for Moraine Solar Energy Center, LLC

Enclosure

Moraine Solar Energy Center Town of Burns, Allegany County, New York & Town of Dansville, Steuben County, New York

NOTICE OF SUBMISSION OF PRELIMINARY SCOPING STATEMENT

EDF Renewables Development, Inc., wholly and directly owned by EDF Renewables, Inc. (EDF Renewables) ("Applicant") is proposing to construct a major solar electric generating facility up to 94 Megawatts (MW) in capacity in the Town of Burns in Allegany County, and the Town of Dansville in Steuben County, New York (the "Moraine Solar Energy Center" or the "Facility"). To construct the Facility, the Applicant must obtain a Certificate of Environmental Compatibility and Public Need ("CECPN") from the New York State Board on Electric Generating Siting and the Environment ("Siting Board") pursuant to Article 10 of the Public Service Law and the Siting Board's rules (16 NYCRR Part 1000). This notice announces that on or about February 19, 2020, the Applicant will file a Preliminary Scoping Statement ("PSS"), pursuant to 16 NYCRR 1000.5, which is designed to gather input from the public and interested agencies on the scope and methodology of studies to be conducted in support of a future Application. The filing of the PSS will start a 21-day public comment period on the scope and methodology of the studies proposed.

The PSS filing marks the beginning of a formal public scoping process. The PSS document will, among other things, describe and identify: the environmental setting in the area where the Facility is proposed, the potential environmental and community impacts from construction and operation of the Facility, and anticipated benefits of the Facility on the environment and local community, as well as on the State's achievement of its renewable energy generation goals. The PSS will identify and describe the proposed environmental studies it plans to conduct during the Article 10 process in order to assess potential impacts to land uses in the Facility area; public health and safety; ecological resources, protected species and habitats, and water resources; communications, transportation, and utilities; cultural, historical and recreational resources; visual impacts and screening; sound; and impacts on the statewide electrical system, among other things. Further, the PSS will outline potential measures to minimize environmental impacts from the Facility, as well as reasonable alternatives, other required permits/authorizations, and other relevant information to be provided in the Article 10 Application.

The Facility is proposed to include the installation of rows of photovoltaic ("PV") panels, no more than 12 feet in height and arranged in discrete subarrays dispersed throughout the Facility Site, as well as associated electrical collection lines, inverters, potential energy storage capacity, fencing, access roads and an Operations and Maintenance ("O&M") building. The Facility would deliver electricity to the New York State power grid via a short 115kV transmission line connecting to a new point of interconnection ("POI") bay at New York State Electric and Gas's Moraine Substation in the Town of Burns (Allegany County), which then connects to the 115 kV Meyer to Moraine Road transmission line that runs north-south through the Facility Site. More information on the proposed Facility can be found on the Siting Board's website under Case 18-F-0498, on the project's dedicated website (www.morainesolar.com), and at the local document repositories listed at the end of this notice.

Within 21 days after filing of the PSS, any person, agency or municipality may submit comments on the PSS by serving such comments on the Applicant and filing a copy with the Secretary to the Siting Board at the addresses provided below. The Applicant will prepare a summary of the material comments and its reply to those comments within 21 days after the closing of the comment period. The scoping process is overseen and mediated by a Hearing Examiner. The Hearing Examiner will schedule a pre-application meeting, which will commence the stipulations negotiation process and will allow for the discussion and award of intervenor funding. Additional notice of the pre-application meeting will be published by the Examiners.

To facilitate participation by local municipalities and community groups, the Applicant will provide \$32,900 (or \$350 per MW) toward an intervenor fund, which is disbursed by the Hearing Examiners to groups seeking assistance with expenses associated with their participation in the Article 10 process during the pre-application review phase. By law, at least fifty percent of these intervenor funds are reserved for host municipalities. Once the PSS is filed, the Hearing Examiners will issue a notice that such intervenor funds are available, will describe the kinds of expenditures which are eligible for receipt of those monies, and will provide instructions and a schedule for interested groups to apply for pre-application intervenor funds. Later in the Article 10 process, when the formal Article 10 Application is submitted, additional application-phase intervenor funding will be made available to facilitate municipal and party participation in the Application and Hearing phase.

Contact Information

To obtain information regarding the Project, please contact: Kevin Campbell Development Manager 53 Jarvis Street, Suite 300 Toronto, ON M5C 2H2 1-833-333-7369

Appendix D
Open House Notices

We believe being responsible in business also means being responsible to the community that hosts our project.

We want to hear from you.

Join the conversation at our community open house where we will introduce you to the Moraine Solar Energy Center, located in the Town of Burns (Allegany County) and the Town of Dansville (Steuben County). The project is proposed to be sited on about 500 acres of land between Arkport Canaseraga Road and State Route 36 near State Route 70 and will generate ~80 MW of clean and sustainable renewable energy.

The community open house will take place on:

WEDNESDAY DECEMBER 5TH 2018 from 5:00 – 8:00 PM

American Legion 83 Main Street Canaseraga, NY

ABOUT THE PROJECT

Originated by Brownfield Group and acquired by EDF Renewables, the Moraine Solar Energy Center is a proposed large-scale solar project (up to 80 megawatts - MWac) located in the Town of Burns (Allegany County) and the Town of Dansville (Steuben County). In addition to working with the host towns, EDF Renewables will obtain the necessary approvals for the Project under New York State's Article 10 Law for the siting of renewable energy facilities. Article 10 is a general state law applicable to all of New York State establishing a process consisting of a series of steps to determine whether to allow a facility to be located and operated on a site. Included in the process are a number of studies and public consultation steps. Article 10 is governed by the New York State Board on Electric Generation Siting and the Environment

and its mandate is to issue Certificates of Environmental Compatibility and Public Need authorizing the construction and operation of electric generating facilities over 25 megawatts.

WHY SOLAR, WHY NOW?

In August 2016, the New York Public Service Commission issued an order requiring that 50% of the state's electricity come from renewable energy by 2030. The Moraine Solar Energy Center would help achieve this target while contributing additional revenues to the local economy.

SUSTAINABLE DEVELOPMENT TODAY

house. Refreshments will be served.

We hope to see you there!

WEDNESDAY, DECEMBER 5TH 2018 5:00 - 8:00 PM American Legion Hall - 83 Main Street Canaseraga, NY

TOWN OF BURNS AND DANSVILLE

The Project will ultimately be sited on approximately 500 acres of mostly cleared private land under lease. Complimentary uses are being considered, such as integrating bees and/or grazing.

THE SITE

Q3 2021

Start of construction

The project is proposed to be sited between Arkport Canaseraga Road and State Route 36 near State Route 70 in the towns of Burns and Dansville

SOLAR FACILITY

The Project will consist of hundreds of thousands of solar panels similar to those installed on over one million homes in the United States. Solar photovoltaic technology is safe, and already employed on land and the rooftops of homes, schools, hospitals, etc.

04 2018

Initiate public consultation

HOMES TOMORROW

Moraine Solar will safely generate enough clean, renewable electricity to power approximately 10,000 New York households.

COMMUNITY BENEFITS

EDF Renewables believes every renewable energy project should be developed in lasting partnership with the local community. We strive to be a good neighbor and work closely with the community to design our project in a way that is respectful to the needs, heritage and future of the Towns of Burns and Dansville.

Employment: 75 to 150 construction jobs at the peak of construction and job opportunities during the operation phases of the Project.

Contributions to local economy: Opportunities possible for local businesses including in the hospitality, material supply or construction service sectors during construction, operation and decommissioning project phases.

Tax revenues: The Project will result in increased revenues to the host Counties, Towns and school districts by means of a payment in lieu of taxes (PILOT) agreement.

Lease: Host landowners will receive compensation for hosting the project.

ABOUT EDF RENEWABLES

For over 30 years, EDF Renewables has dedicated its efforts to creating a green energy economy through the deployment of renewable energy resources while building mutually beneficial relationships with the local communities. We are experts in all areas of project development, operation and management.

Re: Moraine Solar (EDR Project No. 18156)

County: Allegany, Steuben Town/City: Burns, Dansville

Dear Ms. Graff:

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to the above project.

We have no records of rare or state-listed animals or plants, or significant natural communities at the project site or in its immediate vicinity.

The absence of data does not necessarily mean that rare or state-listed species, significant natural communities, or other significant habitats do not exist on or adjacent to the proposed site. Rather, our files currently do not contain information that indicates their presence. For most sites, comprehensive field surveys have not been conducted. We cannot provide a definitive statement on the presence or absence of all rare or state-listed species or significant natural communities. Depending on the nature of the project and the conditions at the project site, further information from on-site surveys or other resources may be required to fully assess impacts on biological resources.

This response applies only to known occurrences of rare or state-listed animals and plants, significant natural communities, and other significant habitats maintained in the Natural Heritage database. Your project may require additional review or permits; for information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the NYS DEC Region 8 Office, Division of Environmental Permits, at dep.r8@dec.ny.gov.

Sincerely,

Nicholas Conrad

Information Resources Coordinator

New York Natural Heritage Program

Project Name: Moraine Solar

Subject: List of threatened and endangered species that may occur in your proposed project

location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (ESA) of 1973, as amended (16 U.S.C. 1531 *et seq.*). This list can also be used to determine whether listed species may be present for projects without federal agency involvement. New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list.

Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the ESA, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC site at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list. If listed, proposed, or candidate species were identified as potentially occurring in the project area, coordination with our office is encouraged. Information on the steps involved with assessing potential impacts from projects can be found at: http://www.fws.gov/northeast/nyfo/es/section7.htm

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/

<u>eagle_guidance.html</u>). Additionally, wind energy projects should follow the Services wind energy guidelines (<u>http://www.fws.gov/windenergy/</u>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the ESA. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Official Species List

Official Species List

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

New York Ecological Services Field Office 3817 Luker Road Cortland, NY 13045-9385 (607) 753-9334

Threatened

3

Endangered Species Act Species

There is a total of 1 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. <u>NOAA Fisheries</u>, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Mammals

NAME

Northern Long-eared Bat Myotis septentrionalis

No critical habitat has been designated for this species.

Species profile: https://ecos.fws.gov/ecp/species/9045

Critical habitats

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.
