NOTICE OF AVAILABILITY OF PRE-APPLICATION  
INTERVENOR FUNDS AND SCHEDULE TO REQUEST FUNDS

(Issued February 28, 2020)

Any person interested in filing an application to construct a major electric generating facility in New York must first file a Preliminary Scoping Statement (PSS) with the New York State Board on Electric Generation Siting and the Environment (the Siting Board). On February 25, 2020, EDF Renewable Development, Inc. (EDF), a subsidiary of EDF Renewables, Inc., filed a PSS in connection with its proposal to construct a 94 megawatt (MW) solar photovoltaic major electric generating facility (the Project) in the Town of Burns in Allegany County and the Town of Dansville in Steuben County, pursuant to Article 10 of the New York State Public Service Law (PSL).

The Project components would include photovoltaic solar panels, proposed to be no greater than 12 feet in height, electric collection lines, inverters and transformers, potential energy storage capacity, fencing, access roads and an Operations and Maintenance building. The Project would deliver electricity to the New York State power grid by a 115 kV transmission line connecting to a new point of interconnection (POI) bay at New York State Electric and Gas's Moraine Substation in the Town of Burns which would then connect to the 115 kV Meyer to Moraine

Road transmission line that runs north-south through the Project site. The Project would be located on land leased from owners of private property.
