# M365 Migration: Company Android Phone Setup

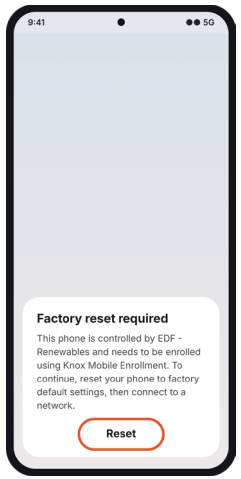

## Before your date

- Back up your photos, videos and chats: the phone is erased.
- Keep it charged, near Wi-Fi, with your eSIM or SIM turned on.
- Your phone keeps a work side and a personal side, as now.

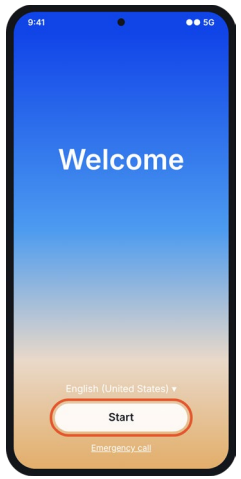

## Setting the phone up

1. When the phone shows Factory reset required, tap **Reset.**
2. On the Welcome screen, tap **Start**.
3. For your review: tick **Agree** to all, then tap Agree.
4. Wait while it activates, then tap **Next**. If it asks about mobile data, tap **Continue**.
5. Set up Wi-Fi: tap your network, enter its password, tap **Connect**, then **Next**.
6. Wait a few minutes while it checks, downloads and gets ready.
7. At Enroll this Galaxy, allow the camera (while using the app) and scan the QR code on this page.

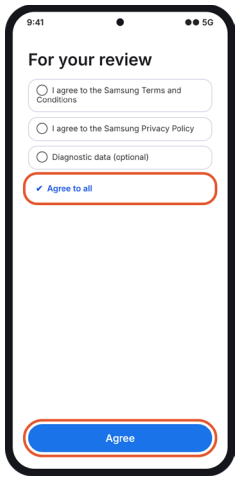

### 1 Tap Reset

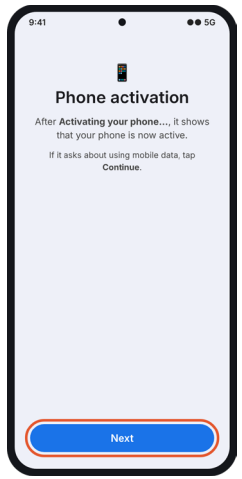

### 2 Tap Start

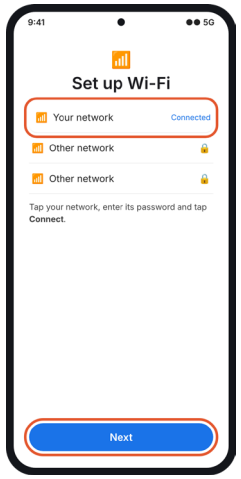

### 3 Agree to all, Agree

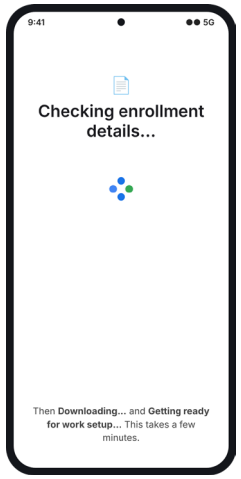

### 4 Tap Next

### 5 Connect to Wi-Fi

### 6 Wait

### 7 Allow the camera

### 7 Scan this QR code

8. Set up a work profile: tap **Agree**.
9. Tap **Accept** & continue, then wait about a minute while it separates your work apps.
10. If Chrome opens, tap **Continue**. Sign in with your work email (@edf-re.com) and password. If Chrome offers to save the password, close it.
11. Your work checklist: tap **Install** work apps, then **Done**.
12. Tap **Register your device**, then Sign in. If Chrome shows ad privacy screens, choose either option. Enter your password again, then tap **Register**.
13. Tap **Next**, choose your device category, then **Done**.
14. Add a personal account? Tap Next to sign in with your own Google account, or Not now.
15. Protect your phone: choose PIN and enter a 6-digit PIN twice.
16. Google services: tap Accept, then choose your backup and Gemini options. On the home screen, tap Work, then Got it.

**Then**

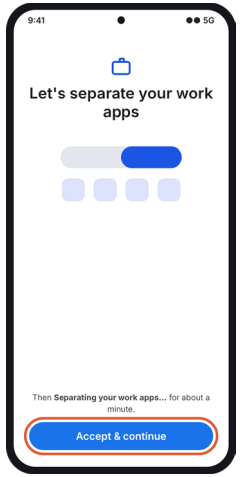

Open Outlook and Teams (in Work) and set up Authenticator again (see its quick guide). Your own apps go on the Personal side.
